I am a detail-oriented professional with exceptional interpersonal skills, team working abilities and 2 years of experience as a full stack developer. I specialize in Javascript, Next.js and React, with a deep interest in the front end design aspects and functionality of computer programming.
My art and design background allows me to offer additional skills and perspective to any coding or programming position.

WORK HISTORY:

Vortex Games/Rushdown Revolt (Jr. Web Developer): *February 2022- February 2023*
- Hands on debugging with Git and Vercel
- Code optimization and SEO experience
- Attended out of state marketing conventions to support and boost the company

HYTE/ Tabulara (Software Engineer): *July 2021- December 2021*
- Developing and optimizing front-end components
- Working remotely with a team of engineers, implementing designs, testing and debugging
- Provided qualitative and quantitative reports to the team
